

Portal

Enhance Accessibility with Fredrikson's Portal

Seamless Integration for Optimal Workflow

Fredrikson's Portal revolutionizes accessibility in production environments, crafted from durable stainless steel to provide a convenient opening and walkway for both operators and goods transportation. Designed to integrate effortlessly with both new and existing conveyor lines, this unit enhances operational areas, making them more accessible and efficient.

The portal is the perfect solution for creating a more accessible and safe working environment around conveyor systems. It stands as a testament to Fredrikson's commitment to customer-centric innovation, offering a practical and efficient way to navigate production areas.

Installation & Cost Efficiency

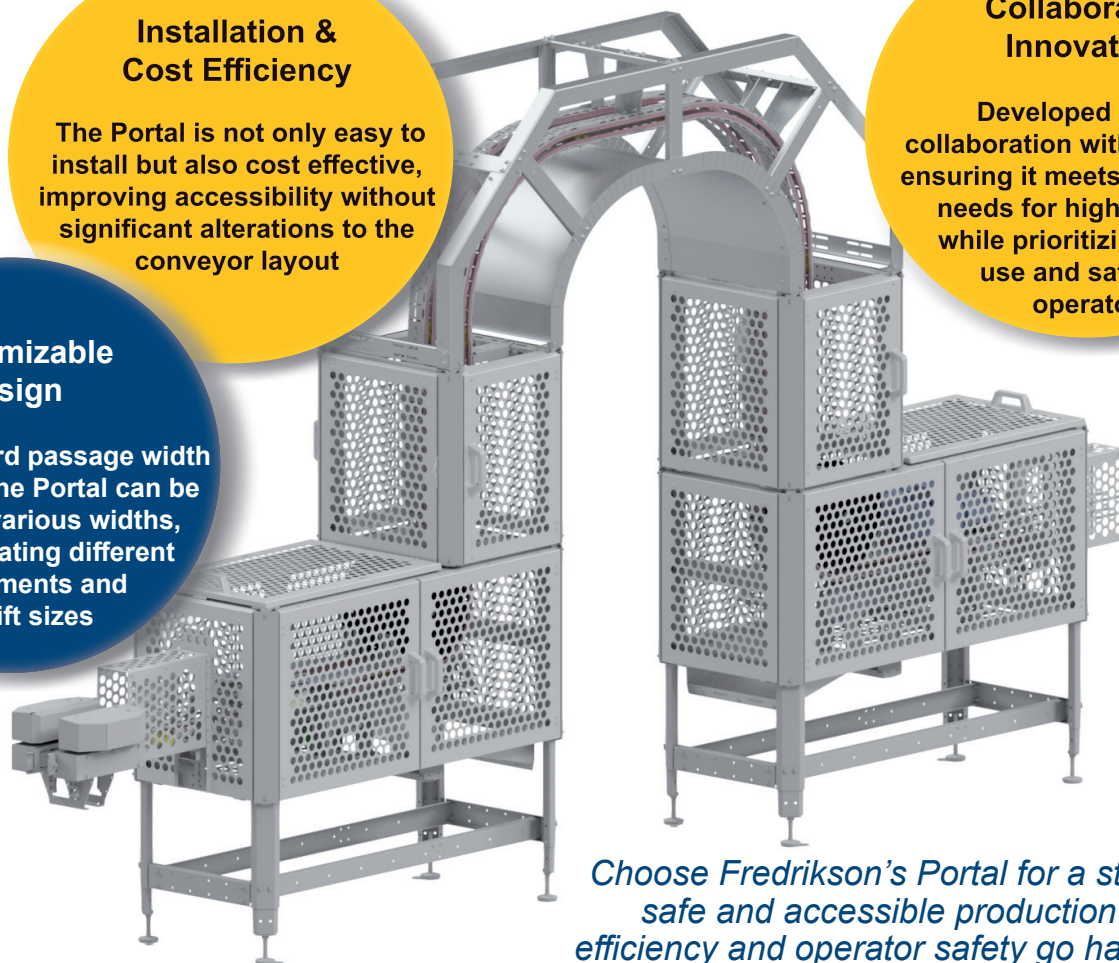

The Portal is not only easy to install but also cost effective, improving accessibility without significant alterations to the conveyor layout

Collaborative Innovation

Developed in close collaboration with customers, ensuring it meets the complex needs for high efficiency while prioritizing ease of use and safety for operators

Customizable Design

With a standard passage width of 1150mm, the Portal can be tailored to various widths, accommodating different requirements and forklift sizes

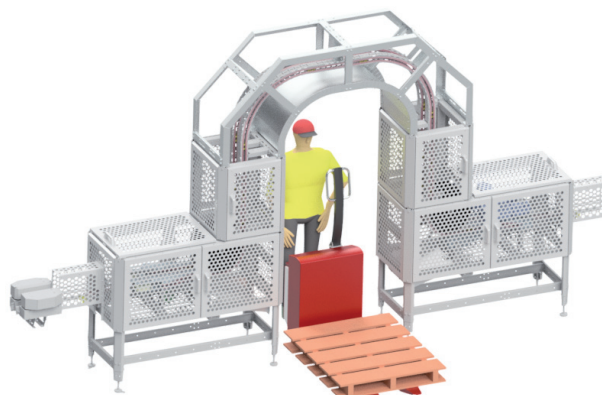

Choose Fredrikson's Portal for a streamlined, safe and accessible production line where efficiency and operator safety go hand in hand

Technical data

Material Stainless steel EN1.4301
Goods width 40 – 120 mm
Chain width 70 mm
Installation dimension Width: 5267 mm
Passage dimension Width: Standard 1150* mm
Capacity max Varies with product specification
Noise emission ~74dB

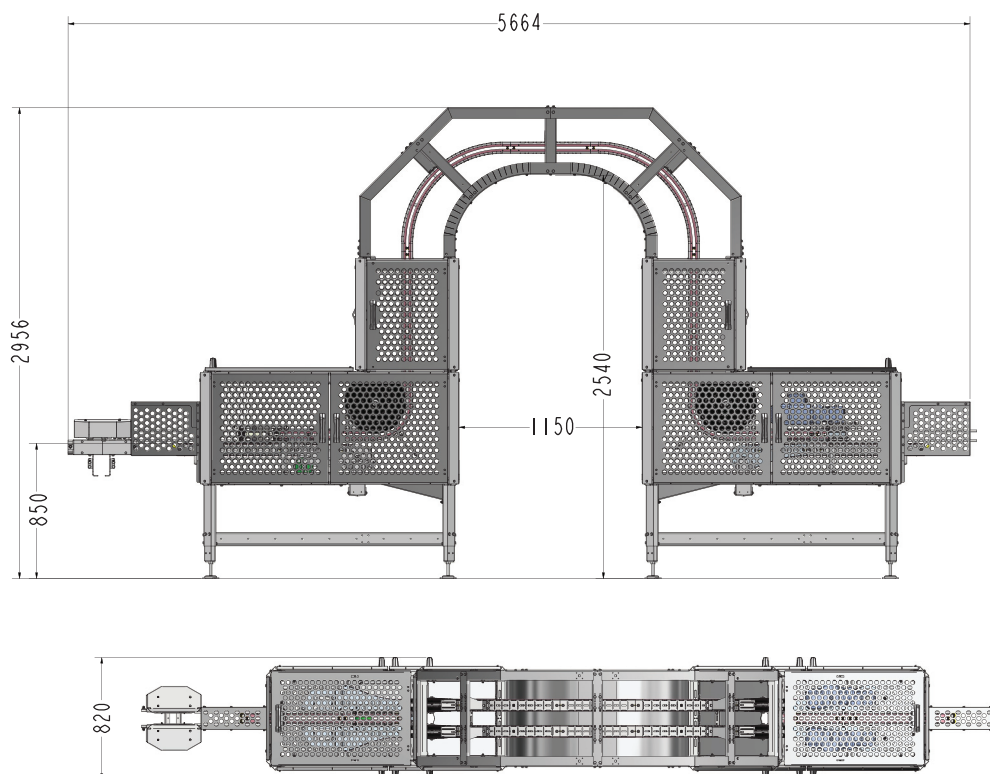

*Customized according to request.

The pictures are computer generated and indicative only.

Electrical data

Communication Profinet or relays
Phase 3N~
Frequency 50/60 Hz
Voltage 400 V
Power consumption Varies with product specification
